Aastra M675i Expansion Module

Aastra 6700i Series Expansion Modules Offer increased Call Control and Flexibility
Aastra 6700i Series expansion modules are designed to increase the power and flexibility of the 6700i Series SIP telephones. Up to three M675i modules can be used to create a powerful, feature rich console option. Modules share power and signaling with the phone, eliminating the need for additional wiring.

Designed for receptionists, administrative assistants, call center agents, power users, and executives who need to monitor and manage a large volume of calls on a regular basis, the 6700i Series Expansion Modules provide an intelligent choice for all Enterprise IP environments.

Key Features and Benefits:

- **Backlit LCD Screen**
  144x128 pixels graphical LCD display with 20 Softkeys with LED's and 3 hardkeys with LED's that provide access to three screen levels offering up to a total of 60 programmable keys.

- **Flexible Features**
  The M675i is equiped with LED status indicators and supports a variety of programmable features including Line, Speed Dial, Busy Lamp Field, Bridged Line Appearance, Shared Call Appearance and Do Not Disturb.

- **Simplified Deployment**
  Sharing both power and signaling with the 6700i Series phone, the M675i can be easily added without additional installation or wiring expense. Simplified configuration via WebUI or configuration file from the phone.

- **Expandability**
  Up to three M675i modules can be used with the 6700i Series models 6755i, 6757i, 6757i CT or 6739i, offering up to 180 additional keys. Growing businesses can start with a single module and add more as their needs increase.
